Dear Colleagues,

The field of breast oncology is ever evolving. With newer surgical and medical managements and evolving advancement in multi-modality therapy, there is a paradigm shift towards minimalism, preserving cosmesis and ensuring quality of life in most cancers. In breast oncology, surgical minimalism is accomplished with Breast Conserving Surgery, sentinel lymph node biopsy and enhancing cosmesis with Onco-plasty. Yet breast conserving surgery and sentinel lymph node biopsy are not widely practiced for various reasons. It is mandatory for the clinicians to be cognizant and be updated with these changes to provide the best possible treatment in terms of aesthetic and oncological outcomes, which is the aim of this workshop.

DR. M. RAMESH
ORGANISING CHAIRMAN

DR. B. BALASUBRAMANIAM
ORGANISING SECRETARY

DR. SURESH VENKATACHALAM
PRESIDENT, TASO

DR. S. AYYAPPAN
SECRETARY, TASO

Program Highlights

1. Mammoplastic techniques-Volume displacement and replacement
2. Axillary reverse mapping
3. Sentinel Node biopsy techniques
4. Breast conserving surgery
5. Nipple sparing mastectomy
6. Whole breast reconstruction
7. Central breast defect reconstruction
8. Latest updates in oncoplasty
